

Global Spelling Style Guide

Baseline Dictionaries: (for uncovered entries)

British English: Oxford English Dictionary (using -ize endings) or Collins (using -ise endings)

American English: Merriam-Webster (MW) or Oxford American

Canadian English: Oxford Canadian Dictionary

Australian English: Macquarie Dictionary or Australian Oxford Dictionary

SPELLING EXCEPTIONS IN ALL ENGLISH DIALECTS

Accents: Optional but permissive in loanwords like “café” and “cafe” while “naïve” and “naive”. Always required in names or names of ethnic groups, ie Métis, Brontë or José. Do not put accents if a word is always accepted without accents even do traditionalists, like “elite” or “hotel”.

Hyphens: Hyphenate before the noun, not after the noun: the actor is well known, a well-known actor.

Numbers: Spell out 1-10. Never start a sentence with a number. Advisable to use phrases like “a total number of...” to avoid violating this rule.

#

4chan

8chan
